Education

HKBK College of Engineering, Bengaluru

Dec 2022 – Present

Bachelor of Engineering in Artificial Intelligence and Machine Learning

CGPA: 8.12

- **Coursework:** Data Structures, Operating Systems, Database Management, Artificial Intelligence, Machine Learning, OOPs (Java), Computer Networks, Data Analysis, Computer Vision, Deep Learning, NLP

Technical Skills

Core Competencies: Machine Learning, Deep Learning, NLP, Fast API, A G I

Programming Languages: Python, Java, C, HTML, CSS, JavaScript

Developer Tools: VS Code, PyCharm, Docker, Google colab, Jupyter notebook.

Frameworks/Libraries: React.js, Node.js, TailwindCSS, TensorFlow, scikit-learn, Hugging Face, Pandas, Numpy

Databases: MongoDB, MySQL

AI Tools: n8n, Cursor, Bolt, OpenAI, Claude, GitHub Copilot, Warp, Replit AI.

Experience

Jun 2023 – Aug 2023

AI/ML Developer

Remote

- Designed and deployed advanced ML/DL models, delivering high-performing real-time AI solutions using Python, PyTorch, and OpenCV.
- Enhanced model performance through evaluation and fine-tuning, driving reliable deployments and AI applications.
- Optimized and deployed AI solutions in production, boosting system performance and reliability by 40–45 percent across multiple projects.

Projects

RAG PDF Question and Answer System | *Python, Streamlit, LangChain, FAISS, Gemini LLM* | [Streamlit](#) December 2025

- Built a complete RAG-based system supporting multi-PDF upload, advanced parsing (PyMuPDF, pdfplumber, PyPDF2), and a full retrieval pipeline using text chunking, SentenceTransformer embeddings, and FAISS vector search.
- Integrated Google Gemini models with intelligent fallback logic to deliver accurate, citation-backed answers while implementing caching and vectorstore auto-loading for optimized performance.

Object Detecting System | *Python, TensorFlow, OpenCV*

August 2025

- Developed and optimized a real-time object and animal detection pipeline using YOLOv5/YOLOv8 and OpenCV.
- Improved model robustness with preprocessing techniques such as CLAHE, Retinex, and Unsharp Mask for challenging lighting conditions; experienced in model training and deployment using Python and PyTorch.

Sentiment-Based Roast & Compliment Generator | *Python, Streamlit, TextBlob, gTTS*

August 2025

- Built a sentiment analysis application to classify text as positive, negative, or neutral using **TextBlob**.
- Designed a dynamic generator producing context-aware roasts or compliments sourced from 100+ custom-crafted witty and tech-themed phrases.

Certifications

Nvidia Jetson Nano

April 2025

- Completed certification covering AI, GPU computing, deep learning, and real-world applications, gaining hands-on experience with advanced tools and frameworks.
- Certificate link: [GitHub](#)

Machine Learning

October 2024

- Gained understanding of supervised, unsupervised, and reinforcement learning techniques with hands-on experience in algorithms such as regression, decision trees, clustering, and neural networks.
- Certificate link: [LinkedIn](#)

Artificial Intelligence in Industrial and Management Engineering – NPTEL (8 weeks)

Aug–Sept 2025

- Worked on AI-driven problem-solving tasks in industrial and management engineering, including prediction, process optimization, and automation.
- Certificate link: [LinkedIn](#)
